NEW YORK--(BUSINESS WIRE)-- **DoubleVerify** ("DV") (NYSE: DV), a leading software platform for digital media measurement, data and analytics, today announced financial results for the fourth quarter and full year ended December 31, 2022.

"2022 was another year of exceptional growth driven by strong execution," said Mark Zagorski, CEO of DoubleVerify. "We measured 5.5 trillion media transactions, grew revenue by 36% to more than \$452 million, achieved 31% adjusted EBITDA margins and generated approximately \$95 million of net cash from operating activities. Our ability to significantly outpace the broader digital advertising industry throughout 2022 was fueled by expanding product usage within our existing customer base and by winning new customers, both of which resulted in market share gains across geographies and platforms. Looking ahead, we are excited to meaningfully scale our solutions across fast-growing and underpenetrated media environments such as CTV, Social media and Retail Media Networks. We continue to successfully drive our 'verify everywhere' mission powered by our industry-leading platform that protects and maximizes media investment, making DV's products a strategic imperative for advertisers and creating durable demand in 2023 and beyond."

- Successfully launched post campaign Brand Safety and Suitability measurement on **TikTok** and on Twitter's newsfeed, known as Timelines. This proprietary solution leverages DV's artificial intelligence, machine learning, ontology, and manual review to give advertisers confidence that their ads are appearing next to content that is brand safe and suitable.

- Launched the industry's first-ever scalable solution to verify viewability on Connected TV (CTV), augmenting advertiser confidence in their media investment on this premium channel. This expansion of viewability enables advertisers to more fully measure delivery of the DV Authentic Ad™ across CTV inventory. The DV Authentic Ad™ is a proprietary, MRC-accredited metric that ensures consistent media quality across digital environments.

"We delivered another strong year with 36% revenue growth and 31% adjusted EBITDA margins as we continued to outperform the broader digital advertising industry through a challenging macroeconomic environment," said **Nicola Allais**, CFO of **DoubleVerify**. "Our fourth quarter and full-year outperformance is a testament to the essential nature of our products and to the strong execution of our teams. Our pipeline remains robust and with nearly \$270 million dollars of cash and zero debt on our balance sheet, we are well-positioned to drive further business expansion and accelerate our long term growth."

First Quarter and Full-Year 2023 Guidance:

DoubleVerify anticipates Revenue and Adjusted EBITDA to be in the following ranges:

First Quarter 2023:

- Revenue of \$117 to \$119 million, a year-over-year increase of 22% at the midpoint.
- Adjusted EBITDA in the range of \$28 to \$30 million, representing a 25% margin at the midpoint.

Full Year 2023:

- Revenue of \$550 to \$564 million, a year-over-year increase of 23% at the midpoint.
- Adjusted EBITDA in the range of \$164 to \$172 million, representing a 30% margin at the midpoint.

With respect to the Company's expectations under "First Quarter and Full Year 2023 Guidance" above, the Company has not reconciled the non-GAAP measure Adjusted EBITDA to the GAAP measure net income in this press release because the Company does not provide guidance for stock-based compensation expense, depreciation and amortization expense, acquisition-related costs, interest income, and income taxes on a consistent basis as the Company is unable to quantify these amounts without unreasonable efforts, which would be required to include a reconciliation of Adjusted EBITDA to GAAP net income. In addition, the Company believes such a reconciliation would imply a degree of precision that could be confusing or misleading to investors.

Adjusted EBITDA

In addition to our results determined in accordance with GAAP, we believe that certain non-GAAP financial measures, including Adjusted EBITDA and Adjusted EBITDA Margin, are useful in evaluating our business. We calculate Adjusted EBITDA Margin as Adjusted EBITDA divided by total revenue. The following table presents a reconciliation of Adjusted EBITDA, a non-GAAP financial measure, to the most directly comparable financial measure prepared in accordance with GAAP.

We use Adjusted EBITDA and Adjusted EBITDA Margin as measures of operational efficiency to understand and evaluate our core business operations. We believe that these non-GAAP financial measures are useful to investors for period to period comparisons of our core business and for understanding and evaluating trends in our operating results on a consistent basis by excluding items that we do not believe are indicative of our core operating performance.

These non-GAAP financial measures have limitations as analytical tools and should not be considered in isolation or as substitutes for an analysis of our results as reported under GAAP. Some of the limitations of these measures are:

- they do not reflect changes in, or cash requirements for, working capital needs;
- Adjusted EBITDA does not reflect capital expenditures or future requirements for capital expenditures or contractual commitments;
- they do not reflect income tax expense or the cash requirements to pay income taxes;
- they do not reflect interest expense or the cash requirements necessary to service interest or principal debt payments; and
- although depreciation and amortization are non-cash charges related mainly to intangible assets, certain assets being depreciated and amortized will have to be replaced in the future, and Adjusted EBITDA does not reflect any cash requirements for such replacements.

In addition, other companies in our industry may calculate these non-GAAP financial measures differently than we do, limiting their usefulness as a comparative measure. You should compensate for these limitations by relying primarily on our GAAP results and using the non-GAAP financial measures only supplementally.
